**COLOUR:** FAWN  
**CLAA:** PENDING  
**AOA:** PENDING  
**SIRE:** TNC GENESIS NEXT GENERATION  
**DAM:** ARRIBA AMBROSIA  
**HISTOGRAM:** PENDING

Genesis has done it again! We have been so pleased with the characteristics that he consistently throws in his offspring. Sheena has solid, correct conformation and a spunky attitude. Her fleece is fine with excellent uniformity of fineness and well defined crimp throughout the blanket. And of course, the big thing that Genesis does so well, Sheena's fleece is as bright as the midday sun and soft as a summer breeze. In addition to all of that, there is lots of it. She shows very good density and all of these characteristics are the improvement on the dam that we had expected. The consistency of positive traits that Genesis throws are evident in Sheena and one should expect those awesome traits to be well established in the genetics. Sheena will bump up the quality in your breeding program. We have no doubt. [www.alpacafarm.ca](http://www.alpacafarm.ca) for more info.
